

Setting up 2-factor Authentication in Facebook.

To turn on 2-factor authentication using text message (SMS) codes for your mobile device:

1. In the bottom right of Facebook, tap menu.
2. Scroll down and tap “Settings & privacy” then tap Settings.
3. Tap “Password and security”
4. Tap Use two-factor authentication. You may be asked to re-enter your Facebook password at this point.
5. Tap Text message (SMS) when you're asked to select a security method and follow the on-screen instructions.
6. Once you've turned on text message (SMS) codes, you should also set up a second security feature, such as a security key or recovery codes. This helps to protect you in case your mobile phone is lost, stolen or hacked.

Login

Change password
It's a good idea to use a strong password that you're not using elsewhere

Two-factor authentication

Use two-factor authentication
We'll ask for a login code if we notice an attempted login from an unrecognized device or browser.

Authorized Logins
Review a list of devices where you won't have to use a login code

Setting Up Extra Security

11:49

Two-factor authentication

Help protect your account

If we notice an attempted login from a device or browser we don't recognize, we'll ask for your password and a verification code.

Select a security method

Authentication app
Recommended · Use an app like Google Authenticator or Duo Mobile to generate verification codes for more protection.

Text message (SMS)
Use text message (SMS) to receive verification codes. For your protection, phone numbers used for two-factor authentication can't be used to reset your password when two-factor is on.

Security key
Use a physical security key to help protect your Facebook account from unauthorized access. You won't need to enter a code.
